

PRESTO XS

DOOR SYSTEM

PRESTO XS

DOOR SYSTEM

Presto XS is a single-chamber, narrow-profile steel system without a thermal break for use in internal structures with a depth of 50 mm. The system includes complete solutions in the field of hardware and accessories and can be used for the production of doors, partition walls and display cabinets.

Specification:

- Installation depth 50 mm,
- system without a thermal break,
- glazing with packages up to 24 mm,
- powder coating in any color from the RAL palette,
- internal installation system,
- profile connections are welded and ground, which makes the connections invisible,
- profiles flush both inside and outside,
- filling with glass or panel,
- Visible width of sections from 18 mm (door) from 23mm,
- Min. Visible width for the cross-section (frame + sash): 45 mm.

Available colours: All steel systems from our offer are powder coated - according to the RAL palette.
