

WINDOW MOSQUITO NETS

WINDOW MOSQUITO NETS

Protection against nuisance insects or impurities from the outside, such as leaves, dirt or dust, can be easy and effective thanks to our range of mosquito nets. Our products are a solution that is easy to install and convenient to use, which is both aesthetic and elegant. The customer can freely choose from various frame, door, sliding and rolling mosquito nets. Numerous types of mosquito nets and their installation techniques allow you to choose the right product for each type of window or door.

As a manufacturer of roller blinds and mosquito nets, we offer the possibility of direct integration of the roller blind with the mosquito net already at the production stage. This means that the roller blind can be equipped with special guides that allow for easy installation of the mosquito net without the need to install it outside the window. The great advantage of this solution is also the fact that mosquito nets do not interfere with the operation of external roller shutters in any way, and do not limit visibility in the light of the window*.

All our mosquito nets are made of extruded aluminium and fiberglass net, which ensures durability and high resistance to weather conditions and UV radiation. The profiles are painted using the powder coating technique in the colour selected by the customer from the RAL palette.

By choosing a mosquito net from our offer, you can be sure that you are investing in a high-quality product that will serve you for many years.

* does not apply to MRS

Frame mosquito net PRIME

Standard frame system made of extruded aluminium and mounted on the window frame with dedicated mounting plates. Brush sealing is available.

Mosquito net PRIME FLAT

Aluminium frame mosquito net with a slim design allowing it to be installed with most lintel roller shutters. Brush sealing and installation in the window opening are available.

Mosquito net PRIME NL

Designed mainly for windows for the Dutch market, including the Ideal 7000 NL system. It is installed in the window light, using dedicated mounting plates.

Fixed mosquito net MRS

The mosquito net is designed for installation in PVC windows and is available in woodgrain colours. Profiles can be joined at a 90° angle with a plastic or a 45° angle with an internal corner. These are the only mosquito nets that can be adapted to model windows.

Fixed mosquito net MRSZ

A system designed for installation in flush aluminium windows. Woodgrain colours are available. It is equipped with hooks at the top and bottom net.

Rolling mosquito net MZN

Equipped with a has a small-sized box with side guides and a designated brake, which allows gentle closing of the bottom bar to the box.

Rolling mosquito net MZH

The roll-up mosquito net is equipped with a hook-and-loop fastener that provides additional sealing of the bottom section.

Sliding mosquito net MPH VERTI

Complements the range of pleated mosquito nets and is designed primarily for installation on window frames and roof windows. Closing and opening are very easy and smooth thanks to the springs in the lower profile. Maximum dimension 2300x2000 mm.

Door mosquito net

An excellent solution for entrance, balcony, and terrace doors. The width of the door, including the frame, is 80 cm. Specialised mesh and kick plate can be used. It is possible to create double doors and install a kick plate.

Door mosquito net SALOON

A rigid and robust mosquito net due to the use of aluminium protective plates and folded internal corners. No frame; there is only a leaf with 3 hinges as standard. Width 20 mm.

Mosquito net CLICK-ROLL

A convenient and aesthetically pleasing solution that can be combined with any classic and sliding doors, as well as HST systems with a slanting threshold. Thanks to its designated track, the mosquito net slides smoothly and faultlessly.

Sliding mosquito net

The sliding system uses a mechanism of parallel guides at the top and bottom of the frame. This solution is dedicated to HST and PSK sliding systems. Possibility of using dedicated mesh and kick plate. 2-leafed mosquito net available for large spans.

Sliding mosquito net SLIDER

Ideally suited for zero-threshold sliding door systems, as it is installed on tracks at floor height, without a threshold. Rigid construction thanks to folded inner corners. The recessed inner side replaces the handle. Width 20 mm.

Pleated mosquito net MPH HARMONY

A special pleated mesh that folds like an accordion when closed and retracts into the side profile to save space. Designed for installation on terrace doors and balcony niches. Width 21 mm. Can reach spans of up to 4 m.

Pleated mosquito net TOP-ZAG

Designed for very large openings, up to 8 metres wide. It can be installed on or in the recess, which in no way restricts the functionality of the door.

Folding mosquito net FIT-ZAG

An opening to one side mosquito net that can be fitted in the double guide rail of the external roller shutter, and between the window sash and the external roller shutter curtain. A recess in the profile replaces the handle. Mesh colour black. Profile width 13 mm.

Pleated mosquito net MPH DUAL

A double mosquito net with the option of a corner variant without a post. Can be used on terrace doors up to 6 m wide and 3.2 m high.

MESHES

In our offer, You will find various types of meshes tailored to your needs and requirements:

Classic mesh

(black or grey) - this is the base product, characterised by high strength and resistance to UV radiation and weather conditions.

AF_SMR_1.2_20 / AF_SMR_1.2_03

Anti-allergy mesh

(black) - made of polyester; it is designed to prevent pollen from entering the interior, which is particularly important for people suffering from allergies.

AF_SMR/2/1,2/20

Extra strong mesh

(black) - designed mainly for rooms with pets, such as dogs or cats. It has an extremely strong construction, which provides protection against scratching and biting.

AMK_PSB152

Mesh with better transparency

(black) - less visible to the naked eye when compared to standard mesh. It is ideal for those who value an unobstructed view outside their window.

AF_SMR/1/1,4/20

Anti-smog mesh

(black or grey) - an innovative solution that helps reduce the level of pollutants in indoor air. By using it on your windows, you can enjoy clean air without opening your windows and exposing yourself to pollution from the outside.

RN_RWM_5.0

Sunscreen mesh

(beige-grey) - protects against harmful UV rays and provides pleasant shade on hot days. Its neutral colour fits perfectly into various spatial arrangements, and the high quality of the material ensures long-term use.

AMK_MOSK_SCR

Extra strong aluminium mesh

(silver colour) - ideal for protection against insects and small rodents, made of metal resistant to corrosion and weather conditions. In addition, its exceptionally strong construction provides protection against mechanical damage.

AF_SMR3_1.2_00

Vegas Plisse STANDARD

Vegas Plisse pleated roller blinds are an elegant and functional solution that perfectly suits windows with unusual shapes, such as triangles or semicircles. Available in many colours and patterns, the roller blinds can be adapted to the style of any interior, and the regulation of the amount of light entering the room allows for the right mood and atmosphere.

Vegas Plisse DUAL

The advantage of these roller blinds is the possibility of easy and fast installation without the need to hire professionals, granted by the use of non-invasive hooks. The cover strip ensures the stability of the roller blind and protects it from slipping. Thanks to the use of aluminium profiles and stylish handles, these roller blinds look very aesthetically pleasing and fit into any interior.
